

Celebrating learning together in faith, hope and love

ART SUBJECT FRAMEWORK

Curriculum intent:

At Bishop Perrin School we understand the importance of Art and Design education as part of a child's development. We use the Art and Design to broaden the children's understanding of the Arts and other areas of the curriculum as well as a platform to improve children's wellbeing. The process of engagement in the arts has resulted in increased confidence and improved self-esteem for our children.

Art activities enrich children's learning and enables them to communicate their thoughts, ideas and observations in a practical and expressive way. In talking about art and evaluating their own and others' work, children are encouraged to develop their visual language, ideas and feelings. Through experience of a variety of materials, tools and techniques children have the opportunity to record creatively the world around them.

Purpose:

Art, craft and design embody some of the highest forms of human creativity. A high-quality art and design education should engage, inspire and challenge pupils, equipping them with the knowledge and skills to experiment, invent and create their own works of art, craft and design. As pupils progress, they should be able to think critically and develop a more rigorous understanding of art and design. They should also know how art and design both reflect and shape our history, and contribute to the culture, creativity and wealth of our nation.
